

**Brand: BendPak**

**Description: Aluminum Full-Length Middle Deck Platform / Diamond Plate**

This optional two-piece, full-length middle deck platform fits all BendPak HD-9 Series lifts providing additional storage space. The lightweight aluminum decks transform your lift into a mezzanine lifting system providing additional square footage for storing motorcycles, ATV's or other garage clutter up and out of the way. Lightweight aluminum construction makes removal and installation a cinch so you can gain hassle-free access to the vehicle underside whenever you need to. They also prevents potentially harmful fluids from dripping below the lift platform so you can rest easy knowing that bottom vehicles, equipment and flooring are protected from nasty spills. An attractive diamond-plate finish provides a sure-footed non-slip surface. 350-lb. capacity each
